About Me

Web and application developer with hands-on experience building websites, e-commerce platforms and business applications for small businesses and growing organisations. Experienced across development, deployment, integrations, technical support and ongoing maintenance, with a practical approach to solving real business problems through technology.

Work Experience

Freelance Web & App Developer

Independent | Cape Town | 2022 – Present

- Deliver websites, e-commerce platforms, and custom web applications for small businesses and independent clients.
- Design and develop responsive digital solutions using modern web technologies and CMS platforms.
- Manage projects from requirements gathering and development through deployment, maintenance, and technical support.
- Manage domains, hosting, deployments, integrations, backups, and ongoing website maintenance.
- Work directly with clients to translate business requirements into practical and effective digital solutions.

Lead Developer & Technical Support Specialist

webXtreme | Feb 2025 – Jul 2026

- Managed and maintained 100+ live client websites, providing development, technical support, and ongoing maintenance.
- Managed 50–60 active client tasks, balancing website development, troubleshooting, updates, and client support.
- Designed and developed WordPress and WooCommerce websites using Elementor, HTML, CSS, JavaScript, and PHP.
- Diagnosed and resolved issues involving hosting, plugins, payment gateways, shipping integrations, performance, and security.
- Managed hosting, domains, DNS, migrations, backups, integrations, and website deployments.
- Worked directly with clients to understand requirements, implement solutions, and provide ongoing technical support.

Assistant Manager / Joinery Technician

Stanco Kitchens | Jan 2022 – Dec 2022 · Jan 2024 – Dec 2024

- Managed daily operations, inventory, and staff in the owner's absence.
- Produced custom joinery from technical drawings, maintaining accuracy, quality, and attention to detail.
- Coordinated production requirements and ensured work was completed accurately and to specification.
- Developed strong planning, problem-solving, time management, and accountability skills.

Figma, Canva, VS Code, GitHub, Trello, n8n

SELECTED PROJECTS

A selection of projects that showcase my skills, experience and the value I deliver.

01

AS Construction Management System

WEB APPLICATION · BUSINESS SYSTEMS

Custom site-management application built to centralise project activity, progress tracking, team coordination and operational reporting. Designed to give construction teams a clearer view of active projects, reduce reliance on fragmented information, and make day-to-day site management more organised.

React · Supabase · Vite · JavaScript · HTML5 · CSS3

02

Property Listing Platform

WEB APPLICATION · CMS · REAL ESTATE

Structured property listing platform built to make properties easier for customers to browse while giving the real estate team a more manageable way to maintain and update listings. The platform improved how property information was presented online and created a more consistent experience across the agency's portfolio.

WordPress · PHP · JavaScript · CSS

03

City Ceilings

E-COMMERCE · WEB DEVELOPMENT

Catalogue and e-commerce platform developed to organise a technically complex building-supplies range into a clearer customer experience. The website helps customers discover products more easily while supporting the business's transition between physical branch sales and its growing online presence.

WordPress · WooCommerce · E-Commerce

04

Libra Joiners & Interiors

WEB DESIGN · DEVELOPMENT · PORTFOLIO

High-end portfolio website redesigned to better represent the quality of the studio's work and create a stronger first impression for prospective clients. Photography-led layouts, responsive design and streamlined content make it easier for visitors to explore previous projects and understand the company's capabilities.

WordPress · Responsive Design · UI/UX
